Re: New Home Construction – Lot 77, God’s Little Acre

Dear Builders:

My wife and I have engaged an experienced and knowledgeable home inspection company, HomePro Of Mid Florida, Inc., at our expense to assist us during your construction of our new home. We have selected five (5) essential stages of construction to be inspected: Pre-Slab, Dry-In, Pre-Drywall, Trim-Out and Final. HomePro will report their evaluation of construction at each of these stages directly to us. Items of concern that are observed as a result of these inspections will be relayed to you by us, in writing.

We would like the courtesy of you notifying us when each stage of construction is reached, so we can notify HomePro to perform the desired inspection at that particular stage. Attached is a Staged Inspection Schedule describing the state of construction at each desired stage. I can be reached at _____ during the day or at _____ in the evenings.

Your full cooperation in allowing us to follow the construction of our new home through our independent inspection company is appreciated and expected.

Sincerely,

An Astute Buyer
